

VERTISA VSB SERIES STEAM BOILERS

OUR PRODUCTION

- ← Liquid and gas fired steam boilers
- ← Solid-fuel boilers (Coal, Wood pellets)

Flame pipe structure, highly efficient, fully cylindrical 3 PASS Scotch-type boilers have large water volumes in order to meet sudden steam injections.

3 Pass scotch type boilers are preferred in the steam production industry due to their ease of maintenance and high efficiency . All design and manufacturing is in accordance with CE and DIN EN norms.

CONSTRUCTION

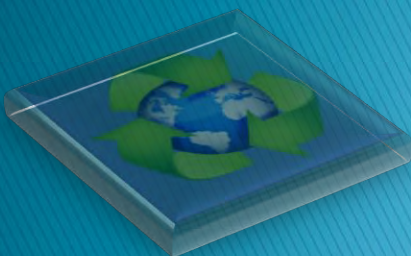

- ← Pressure-resistant body.
- ← Optimal dimensioning of gas transit.
- ← Large volume of quality vapor steam.
- ← Water cooled fire chamber.
- ← Morrison-type full-size corrugated furnace.

MATERIAL

- ← Boiler shells, mirrors, furnace and Fire sheets comply with DIN EN 10028 norms.
- ← Boiler seamless steel pipes comply with DIN 17175 Norms

BOILER CAPACITY

- ← 100 kg/h- 7.000 kg/h steam production.
- ← Description: Three-Pass Steam Boiler
Type: cylindrical, half-cylindrical
- ← Capacity: 100 kg/h – 7.000 kg/h
- ← Diameter: 1000 mm - 2200 mm
- ← Operating Pressure: 4.0 - 6.0 bar
- ← Test Pressure: 6 - 10 Bar
- ← Material: P235GH, 6337 -6341
- ← Fuel Type: Diesel, Natural Gas, LPG, LNG, CNG, Coal
- ← Smoke pipes: St 35.8 comply to DIN 2448
- ← Insulation: 80 kg/m 10 cm glass wool coated with galvanized or stainless steel sheet
- ← Warranty: 1 year (2 years optional)
